This treatment also includes an Almond Milk Bath, exfoliation with an Almond Moisture Scrub, heated Almond Illuminating Masque for intense moisture treatment and a relaxing Almond Hydrating Lotion massage.

### ANTI-AGING MANICURE

This new manicure works to remove the signs of aging on the hands. An ageless masque is used to exfoliate the skin, leaving it soft and smooth. Next, an anti-aging serum is applied to hydrate and help remove signs of aging like dark spots, lines, and wrinkles. This luxury manicure is concluded using an SPF moisturizer to protect the hands and a classic polish.

### FRENCH MANICURE

A French manicure is in the polishing. Your natural nail tips are painted opaque white and sheer pink or beige is applied over the top. The finished result is a well-manicured look with a French flair.

### PINO SPA CLASSIC MANICURE

You'll begin this service choosing your favorite PINO candle scent. Each candle is made with plant extracts and essential oils that have their own unique benefits. Your scrub and massage will leave your skin silky smooth. Your nails and cuticles will also be attended to and a perfect polish applied.

### POWDER PERFECT MANICURE

Acrylic services reinvented! Dipping powders are a quick-applying, odor-free acrylic alternative that promotes a clean-air environment while offering gel-like shine and weeks of wear without the need to light cure. Your nails and cuticles will also be attended to.

### SHELLAC MANICURE

Like a Classic Manicure, hands are conditioned, massaged, and cuticles are pampered and moisturized. Nails are shaped then polished with Shellac, a breakthrough, patent-pending UV3 technology that combines the ease of polish with the permanence of gels. Zero dry time is required and nails are left with a mirror-finish that lasts longer than regular nail polish.

## PEDICURES

### DO. ACTIVE PEDICURE

### REFLEXOLOGY (15 MIN.)

Reflexology is a natural healing art based on the principle that there are reflexes in the hands and feet, that correspond to every part, gland, and organ of the body. By applying pressure on these reflexes, tension is relieved, circulation is improved and the natural functions of the related areas of the body are helped. It's therapy for the whole body through your feet. Add this service to any of our pedicures.

**MASSAGE**

**PINO NATURAL SPA THERAPY** provides formulations made up of natural ingredients that are dedicated to a greater harmony with body, mind, and spirit. The PINO formulations use carefully selected plant extracts and essential oils that combine to fit into three distinct aromatherapy themes: active for energy, balance for stability, and calm for relaxation. Lay back, relax, and prepare to be pampered.

- Partial Body Massage
- Full Body Massage

**CONTOUR MASSAGE**

Our newest massage service. The Contour Massage is a body-shaping massage that will leave you with a slender silhouette, firmer body, and prettier skin. This massage is effective and precise while still offering you a gentle and relaxing massage.

**PREGNANCY MASSAGE**

If you are experiencing a normal, healthy pregnancy, this is a safe and soothing treatment after your first trimester. It is similar to a regular, full body massage but uses different positioning.

**WARM SEA FOAM MARINE MUD**

Add a warm sea foam mud wrap to any massage. This relaxing bubbling seaweed mud is recommended for those areas where you feel tight, sore, stiff or strained. Applied locally, this very unique treatment immediately soothes the affected area and relieves tension.

**ADD REFLEXOLOGY TO ANY MASSAGE** **15 MIN.**

Reflexology is a natural healing art based on the principle that there are reflexes in the hands and feet, which correspond to every part, gland, and organ of the body. By applying pressure on these reflexes, tension is relieved, circulation is improved and the natural functions of the related areas of the body are helped. It's therapy for the whole body through your hands and feet.

**CUSTOMIZED HOT STONE MASSAGE**

Experience one of the most popular services in body therapy today. Hot stone therapy combines the therapeutic benefits of heat in conjunction with Swedish and Deep Tissue massage. This technique is invigorating and relaxing using smooth, heated basalt stones for immediate relief from muscle pain and stiffness. The tactile and mechanical stimuli, combined with the warm flowing massage movements of the unique stone stamps and 100% natural oils and plant extracts, support the purification of tissue, relieves tension and stimulates the metabolism. The result is an all over irresistible feeling of relaxation and tension release.

**OLIGOMER® SPA REPLENISHING BODY SCRUB & MASSAGE**

This all-encompassing ocean experience holistically addresses each aspect of well-being. First, the body is scrubbed with freeze-dried seawater crystals and algae-derived alpha hydroxy acid in preparation for a tranquilizing massage. Specific massage techniques, developed by an osteopath, work on tight muscle chains to erase muscle tension. Specific pressure points are also manipulated to rebalance the body's energy flow for a calmly energizing effect. The massage is performed with a combination of mineral-rich seawater and seaside plant oils to fully rebalance the cells of the body while hydrating and regenerating the skin.

**TROPICAL GETAWAY MASSAGE**

Escape to the tropics with this warm and luxurious treatment. Vitamin rich coconut oil with the added freshness of mint leaves the skin soft and moisturized. Partnered with the warm Coconut Compress, this treatment relaxes the muscles and improves circulation throughout the body. The additional touch of the moisturizing mask leaves your skin moisturized from head to toe, taking on a getaway to your own tropical paradise.

**CUPPING MASSAGE**

This ancient therapy has been used for centuries to relax muscles, increase blood flow, and improve circulation. Massage oil is smoothed over the skin first. Cups are then applied to create and release pressure from suction which may cause temporary marking and extended relief. Think of it like a reverse massage. Instead of applying pressure down into your body, you're applying it by drawing it upward. This technique can reduce tension due to stress and inflammation while stimulating the repair and recovery process of your body for therapeutic benefits. It leaves you with a relaxed and healthy sense of relief.
